

NEW GENERATION WINDOWS

The VEKA UK Group

m70 the industry standard

Introducing the new M70 window system from the world's leading PVC-U window systems manufacturer, The VEKA UK Group.

For decades, the original Matrix 70 set the industry standard for classic good looks combined with technical performance. The new M70 builds upon the numerous qualities that made its predecessor a modern classic, with a fully updated design that offers even more benefits for your home, including: heightened security, improved thermal performance and impressive weather proofing.

M70 is one of the most versatile and dependable PVC-U window systems available today, boasting a timeless element that makes it the perfect complement to any property.

Welcome to M70: the standard by which other windows are measured.

A perfect fit

The M70 system can be arranged in virtually any configuration and can be used to create a huge range of different window styles.

Besides traditional Casement windows, M70 is also available as a versatile Tilt and Turn unit, and – to continue the contemporary look throughout your home – French and Residential doors too. Sashes that open at the top or sides can be combined with fixed panes, helping you to achieve the perfect window solution for any situation. Combine this with The VEKA UK Group's 18-strong Variations colour range (see page 9) and it's easy to see how M70 has earned its unrivalled reputation for adaptability.

Excellent for energy bills

M70 will not only meet but exceed your expectations for thermal performance and energy retention.

Its standard-setting design has everything it takes to consistently keep your home warm in the winter and cool throughout the summer. The new M70 has been designed with an impressive five internal 'chambers' to improve thermal performance. This allows the system to achieve an 'A' rating for energy efficiency. With carefully chosen glass and hardware it can even achieve the 'A++' standard: the highest currently certified level of window efficiency!

The warmest areas seen here in red show where heat is being lost from the building.

Red areas have been eliminated after fitting energy efficient VEKA windows.

Safe and secure

PVC-U windows have many benefits over their traditional wooden counterparts, including a superior security performance that will endure for years.

Where timber can wear, warp and rot, M70's metal-reinforced PVC-U frame will remain straight and true for a lifetime – regardless of changes in climate. A formidable barrier against intruders, M70 meets PAS 24 – the industry's design standard for door and window security – and Secured by Design, the official UK Police initiative for 'designing out crime'.

It is compatible with locks, hinges and handles from any of the major manufacturers, including MACO, Yale, DGS, Nico, Fullex, Millenco and more. With M70, peace of mind comes as standard.

Official Police Security Initiative

At home in any home

M70's crisp, bevelled design is equally suited to contemporary houses as it is to traditional, period properties.

With its clean, uncluttered lines, M70 is an ideal window choice for buildings that brim with character. It allows the authenticity of rustic, heritage properties to shine through, while also complementing the understated lines of modern building design. Compatible with a wide range of handle, lock and hinge designs, and available in all 18 shades of VEKA's Variations colour range (see page 9 for details), M70 can be tailored to reflect the essence of your home, right down to the finest detail.

Meet your perfect match with M70.

...with choice of 18 colours

VEKA's Variations range features 14 unique colours along with four of the most authentic woodgrain finishes to be found in the PVC-U window marketplace.

Ranging from classic, timeless White to contemporary Anthracite Grey, the collection encompasses today's most trending colour schemes, including pale pastels and warm, rich tones to suit any style of property. The four woodgrain finishes are virtually indistinguishable from real timber and are steadily graded to cover everything from the rich caramel of Irish Oak to deep, luxurious Siena PN. The Variations colour range further extends M70's versatility, allowing you to really stamp your individual personality on your property.

VEKA: Number one in the UK and worldwide

Every VEKA system comes with the reassurance that you have chosen products from the national and global leader in PVC-U door, window and conservatory systems.

VEKA began in Germany over four decades ago, and is still owned and run by the same family.

Today it has more than 35 manufacturing and sales sites worldwide, employing in excess of 5,200 people. The company expanded into England in 1986, establishing The VEKA UK Group, which now incorporates two leading PVC-U profile manufacturers, VEKA plc and Halo.

Network VEKA, the Group's pioneering installer support brand was established in 1996 to offer homeowners a new way to choose home improvements, with guarantees built-in at every stage.

The Group's Approved Installer Scheme was unveiled last year, allowing professional VEKA and Halo installers another way to demonstrate their commitment to quality.

VEKA proactively champions environmental responsibility and sustainability, offering an identical M70 produced using Infinity profile – indiscernible from our virgin product but made with up to 80% recycled material.

It is estimated that one in four UK commercial window installations comes from The VEKA UK Group.
